ACKNOWLEDGEMENT

I have great pleasure in submitting this Field Work on "**IT DigiTech Solutions (Software Development Company)**"to Kavayitri Bahinabai Chaudhari North Maharashtra University, Jalgaon. It is humble brief that any Field Project can be carried out with success by me. Many other personalities helpings to accomplished this project and it is our duty to express our appreciation to them. I am indebted to **Mr. Kulwant Mahale** for helping us as guide and allow us to do the Field Work at their site. I wish to thank the teaching staff, our friends and persons who help us directly or indirectly for completion of Field Project.

DECLARATION

I am, the undersigned, hereby solemnly declare that the Field Work project entitled **"IT DigiTech Solutions"** has been independently carried out by us based on thorough investigation, observation, and analysis. This Field Work has been undertaken as a partial fulfillment of the requirements for the completion of our academic curriculum at **Kavayitri Bahinabai Chaudhari North Maharashtra University, Jalgaon**.

I am affirm that this project is the outcome of our sincere efforts, conducted under the valuable guidance and supervision of **Mr.Kulwant Mahale**, who has extended his constant support, motivation, and direction throughout the course of this work. His mentorship was instrumental in helping us understand the theoretical concepts and how they apply to real-world scenarios within the IT industry.

This Field Work project has helped us bridge the gap between theoretical knowledge and its practical implementation. It has provided us with real-time exposure to how an IT company like **IT DigiTech Solutions** functions, manages operations, handles clients, and stays up to date with evolving technologies. The experience gained through this project has not only enhanced our technical understanding but also helped us develop key professional skills such as communication, problem-solving, teamwork, and critical thinking.

ABSTRACT

The IT DigiTech Solutions website is developed to make it easier for people to know about the company, its services, courses, and projects. Nowadays, most people prefer to search for information online instead of visiting an office. Keeping this in mind, we developed this website to provide all the important information in one place.

The website is designed using HTML, CSS, and JavaScript for the frontend, while Python Django is used for the backend. The design is kept simple and user-friendly so that visitors can easily browse different sections of the website.

One of the main features of this website is the enquiry form. Students and customers can fill out the form to ask questions or get information about courses and services. The submitted details are handled by the Django backend and can be stored in the database.

The main goal of this project is to improve the company's online presence and make communication between the company and its visitors easier. In the future, more features such as student registration, online course admission, email notifications, and online payment can be added to make the website more useful.

INTRODUCTION

IT DigiTech Solutions is a dynamic technology firm specializing in full-stack development, digital transformation, and enterprise-grade software solutions. Headquartered in India, the company delivers cutting-edge services across web, mobile, and cloud platforms, leveraging technologies such as Node.js, React Native, Flutter, and advanced DevOps practices. With a growing portfolio of live projects and client engagements, IT DigiTech Solutions empowers businesses through scalable, secure, and user-centric applications.

The company fosters innovation through real-time communication systems, automation tools, and ethical cybersecurity practices. It actively supports emerging talent through internship programs focused on hands-on development, UI/UX design, and professional communication.

As of 2026, IT DigiTech Solutions continues to expand its footprint in the global tech ecosystem, contributing to impactful digital solutions across industries.

PROPOSED SYSTEM

The proposed system is a website developed for IT DigiTech Solutions to make information about the company easily available online. Instead of depending on phone calls or visiting the office, students and customers can visit the website to learn about the company, its services, courses, and projects.

The website is designed in a simple way so that anyone can use it without difficulty. Visitors can browse different pages and get the information they need. If they have any questions about a course or service, they can fill out the enquiry form and submit their details through the website.

We have used HTML, CSS, and JavaScript to develop the frontend of the website. Python Django is used for the backend to handle the submitted information and connect the website with the database. When a visitor submits an enquiry, the backend receives the details, checks the information, and stores it in the database when the database connection is properly configured.

The main purpose of this system is to save time, make communication easier, and help IT DigiTech Solutions reach more students and customers through the internet.

In the future, this website can be improved by adding features such as student registration, online course admission, email notifications, and an admin dashboard.

NEED OF SYSTEM

Nowadays, most people use the internet to find information about companies, courses, and services. If a company does not have its own website, it becomes difficult for people to know about its services and contact the company easily. IT DigiTech Solutions needs a website to share information about its company, services, courses, and projects in one place. Students and customers should be able to visit the website anytime and get the information they need without personally visiting the office.

The website also provides an enquiry form where students and customers can submit their names, contact details, and questions. This helps the company receive enquiries online and makes communication easier.

Another important need for this system is to improve the company's online presence and reach more people. It also helps save time and reduces the effort required to provide information manually.

Therefore, this website is useful for both the company and its visitors. It provides an easy way to share information, receive enquiries, and connect with students and customers**.**

SOFTWARE AND HARDWARE REQUIREMENTS

Software Requirements

- **Operating System:** Windows 10/11, macOS, or Linux.
- **Development Environment:** Visual Studio Code (VS Code).
- **Frontend Technologies:** HTML5, CSS3, and JavaScript.
- **Backend Technology:** Python with Django Framework.
- **Database:** SQLite or MySQL (as configured in the Django project).
- **Web Browser:** Google Chrome, Microsoft Edge, Mozilla Firefox, or Safari.
- **Deployment Platform:** Netlify for frontend hosting and a Python-compatible platform for Django backend hosting.
- **Internet Connection:** Required for accessing the website and installing development tools.

Hardware Requirements

- **Processor:** Intel Core i3 / AMD Ryzen 3 equivalent or higher.
- **RAM:** Minimum 4 GB (8 GB recommended).
- **Storage:** Minimum 10 GB of free disk space.
- **Network:** Stable broadband internet connection.

DATABASE DIAGRAMS (DFD / ERD/ USE CASE DIAGRAMS)

Entity Relationship Diagram

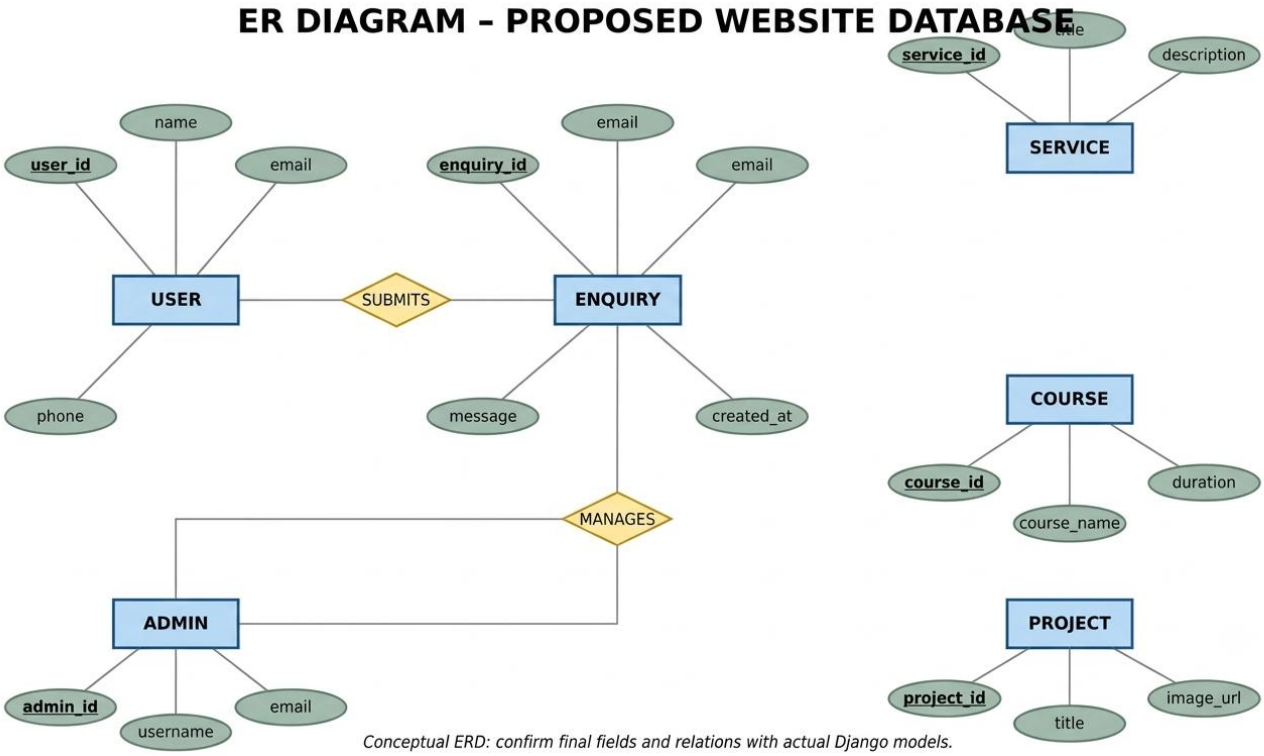

This Entity-Relationship Diagram (ERD) outlines the structural design of the database for the website, showing entities (rectangles), attributes (ovals), and relationships (diamonds):

1. Entities & Attributes

- **USER:** Represents clients or visitors with attributes user_id (primary key), name, email, and phone.
- **ENQUIRY:** Stores user messages with attributes enquiry_id (primary key), email, message, and created_at.
- **ADMIN:** Represents administrators with attributes admin_id (primary key), username, and email.
- **SERVICE**: Stores available services with attributes service_id (primary key), title, and description.
- **COURSE:** Holds course information with attributes course_id (primary key), course_name, and duration.
- **PROJECT:** Tracks project portfolio items with attributes project_id (primary key), title, and image_url.

2. Relationships

- **USER SUBMITS ENQUIRY:** Links users to the enquiries they send through the system.
- **ADMIN MANAGES ENQUIRY**: Links administrators to incoming enquiries for processing and response

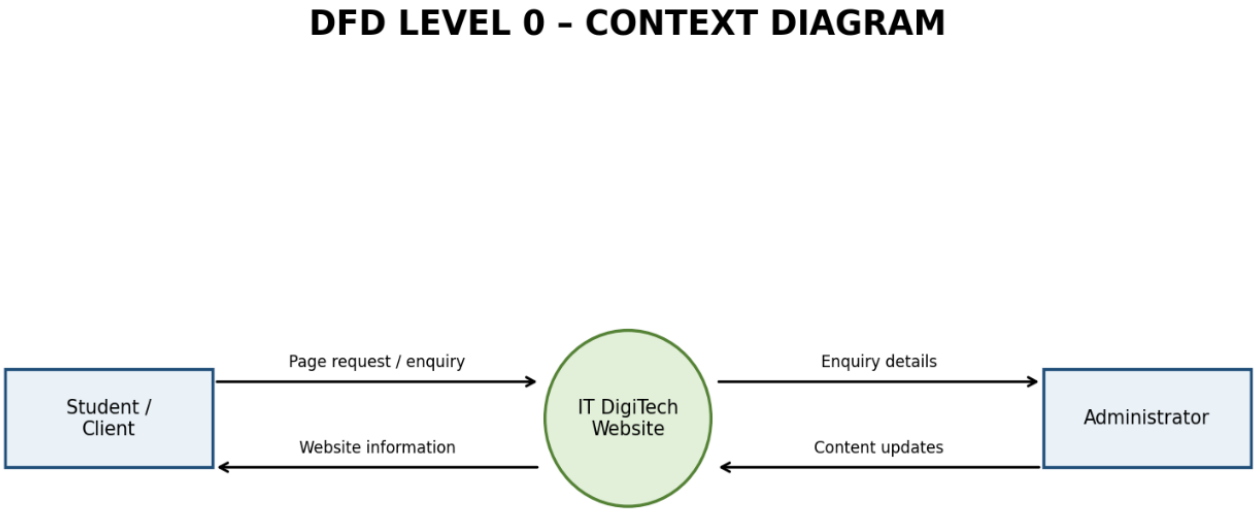

Conceptual ERD: confirm final fields and relations with actual Django models.

Data Flow Diagram

DFD Level 0

- **Central Process:** The entire system is represented as a single process in the middle (IT DigiTech Website).
- **External Entities:** There are two main external users/entities interacting with the system:

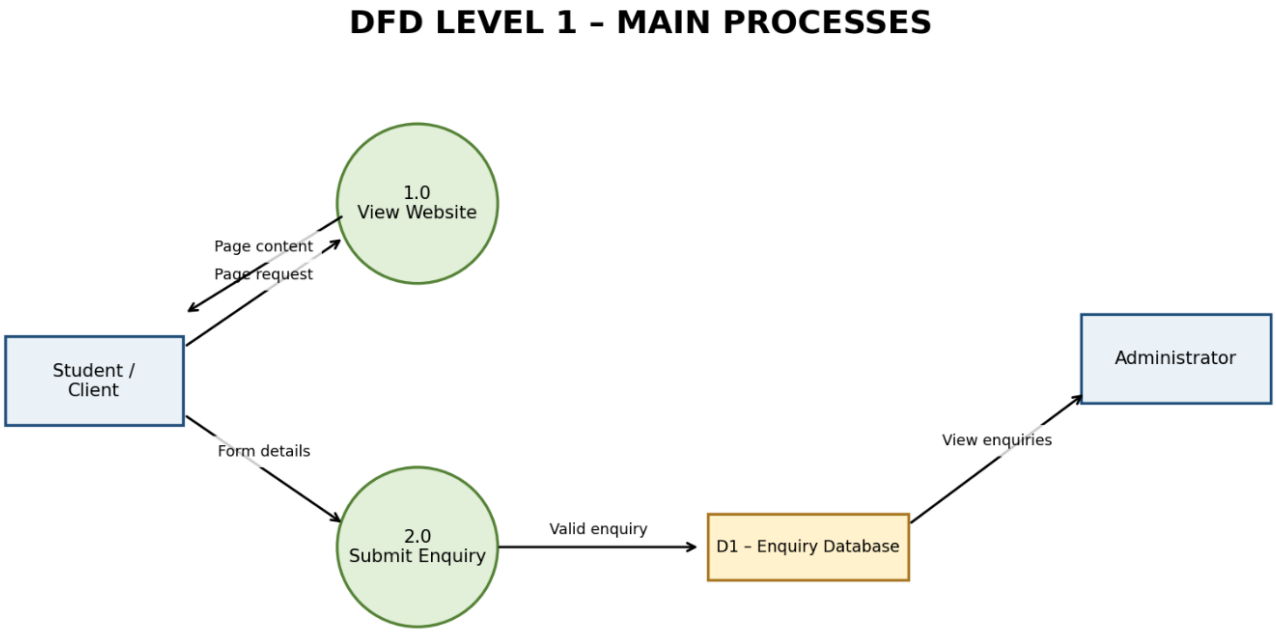

- **Student / Client:** Sends page requests or enquiries to the website and receives website information in return.
- **Administrator:** Receives enquiry details from the system and provides content updates back to the website.

DFD Level 1

This diagram expands the central system into its main internal sub-processes, showing how data moves between users, processes, and storage:

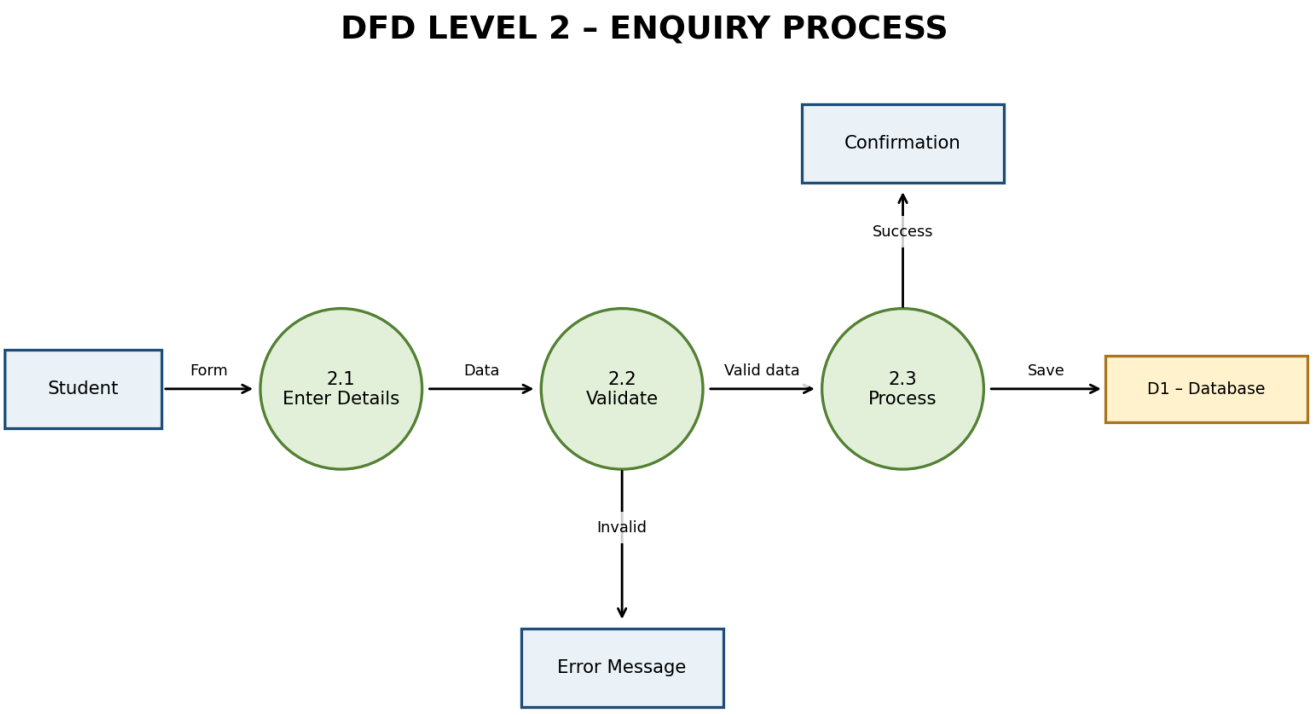

- **Process 1.0 (View Website):** The **Student / Client** sends a Page request and receives Page content back.
- **Process 2.0 (Submit Enquiry):** The **Student / Client** inputs Form details into the system, which validates the request and stores a Valid enquiry in the database.
- **Data Store (D1 – Enquiry Database):** Holds the submitted enquiry data.
- **Administrator:** Accesses D1 – Enquiry Database to View enquiries.

DFD Level 2

This diagram zooms into Process 2.0 (Submit Enquiry) from Level 1 to break down its detailed steps:

- **Process 2.1 (Enter Details):** The Student submits a Form, sending the initial Data **into the system.**
- **Process 2.2 (Validate):** The system checks the submitted data:
  - If the data is Invalid, it routes to an Error Message.
  - If the data is valid, it sends Valid data forward to Process 2.3.
- **Process 2.3 (Process):** Handles the verified information by saving it to D1 – Database (Save) and sending a Success notification for Confirmation.

Use Case Diagram

Key Components

- **System Boundary**: The blue rectangle represents the IT DigiTech Solutions Website system.
- **Actors (Stick figures):**
- **Student / Client**: The primary external user on the left.
- **Admin (optional):** The administrative user on the right.

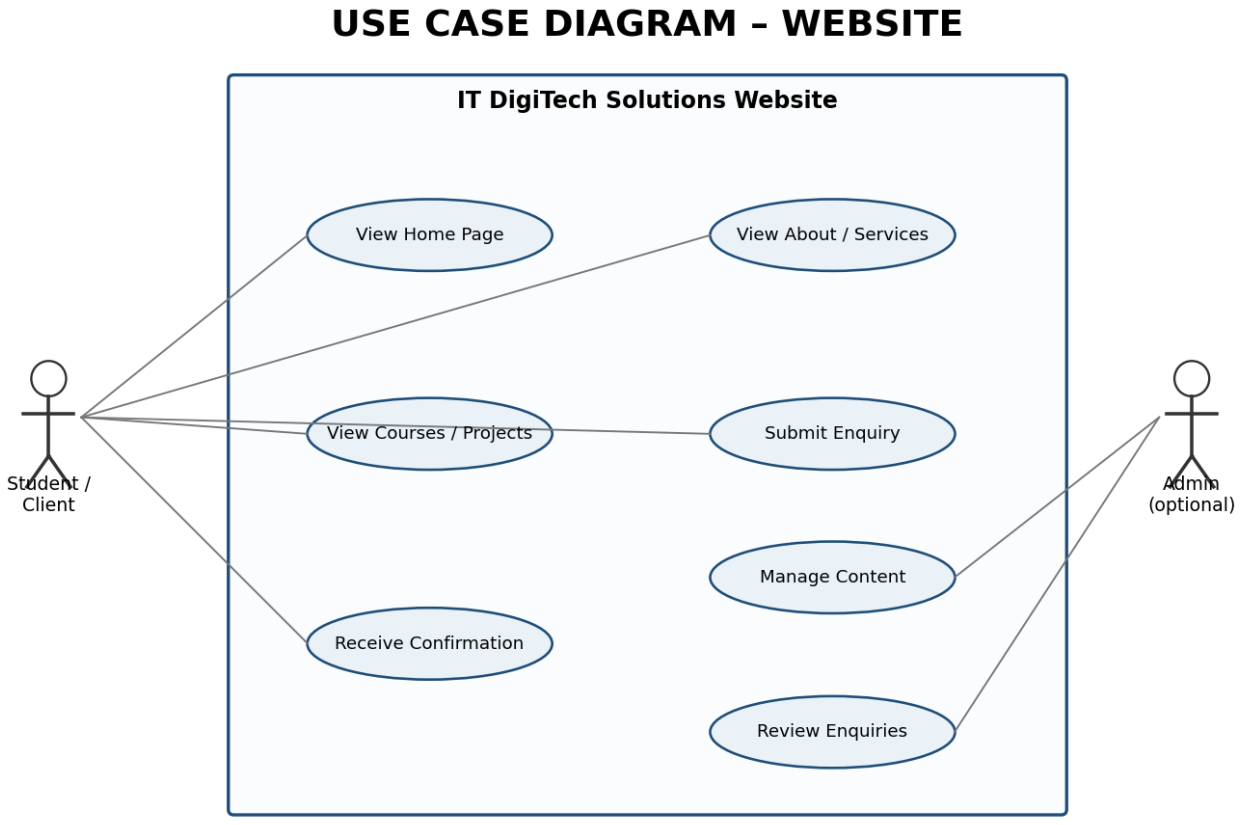

Use Cases (Ovals) & Interactions

Student / Client Actions:

- View Home Page
- View About / Services
- View Courses / Projects
- Submit Enquiry
- Receive Confirmation

Admin Actions:

- Manage Content (update website information)
- Review Enquiries (check submitted client messages)

DATABASE DESIGN

1. USERS:-

Stores user/admin account details if login functionality is implemented.

Field	Type	Constraints
id	BIGINT	PK, AUTO INCREMENT
name	VARCHAR(100)	NOT NULL
email	VARCHAR(150)	NOT NULL, UNIQUE
password	VARCHAR(150)	NOT NULL; store a secure hash, never plain text
phone	VARCHAR(15)	NULL
role	VARCHAR(20)	DEFAULT 'user'
created_at	DATETIME	DEFAULT CURRENT TIMESTAMP

2. SERVICES:-

Stores the services displayed on the website.

Field	Type	Constraints
id	BIGINT	PK, AUTO INCREMENT
title	VARCHAR(150)	NOT NULL
description	TEXT	NULL
image	VARCHAR(255)	NULL; image path or URL
created_at	DATETIME	DEFAULT CURRENT TIMESTAMP

3. COURSES:-

Stores information about training courses.

Field	Type	Constraints
id	BIGINT	PK, AUTO INCREMENT
course_name	VARCHAR(150)	NOT NULL

description	TEXT	NULL
duration	VARCHAR(50)	NULL
fees	DECIMAL(10,2)	NULL
image	VARCHAR(255)	NULL; image path or URL

4. PROJECTS:-

Stores portfolio/project information shown on the website.

Field	Type	Constraints
id	BIGINT	PK, AUTO INCREMENT
title	VARCHAR(150)	NOT NULL
description	TEXT	NULL
image	VARCHAR(255)	NULL; image path or URL
project_url	VARCHAR(255)	NULL
created_at	DATETIME	DEFAULT CURRENT TIMESTAMP

5. ENQUIRIES:-

Stores messages submitted through the service/course enquiry form.

Field	Type	Constraints
id	BIGINT	PK, AUTO INCREMENT
name	VARCHAR(100)	NOT NULL
email	VARCHAR(150)	NOT NULL
phone	VARCHAR(15)	NOT NULL
service	VARCHAR(150)	NULL; or use service_id FK
message	TEXT	NOT NULL
status	VARCHAR(20)	DEFAULT 'pending'
created_at	DATETIME	DEFAULT CURRENT TIMESTAMP

6. CONTACT MESSAGE:-

Stores messages from a separate contact form, if used.

Field	Type	Constraints
id	BIGINT	PK, AUTO INCREMENT
name	VARCHAR(100)	NOT NULL
email	VARCHAR(150)	NOT NULL
subject	VARCHAR(200)	NULL
message	TEXT	NOT NULL
created_at	DATETIME	DEFAULT CURRENT TIMESTAMP

ADMIN MODULE STRUCUTE

1.SERVICE MANAGEMENT TABLE:-

Stores the services displayed on the website and maintained by an authorized administrator.

Field Name	Data Type	Constraints
service_id	INT	PRIMARY KEY, AUTO_INCREMENT
service_name	VARCHAR(100)	NOT NULL
description	TEXT	NOT NULL
image_url	VARCHAR(255)	NULL
status	VARCHAR(20)	DEFAULT Active
created_at	DATETIME	DEFAULT CURRENT_TIMESTAMP
updated_at	DATETIME	NULL
admin_id	INT	FOREIGN KEY

2.COURSE MANAGEMENT TABLE:-

Stores course information displayed to students and visitors.

Field Name	Data Type	Constraints
course_id	INT	PRIMARY KEY, AUTO_INCREMENT
course_name	VARCHAR(100)	NOT NULL
description	TEXT	NOT NULL

Field Name	Data Type	Constraints
duration	VARCHAR(50)	NOT NULL
fees	DECIMAL(10,2)	NOT NULL
syllabus	TEXT	NULL
image_url	VARCHAR(255)	NULL
status	VARCHAR(20)	DEFAULT Active
created_at	DATETIME	DEFAULT CURRENT_TIMESTAMP
admin_id	INT	FOREIGN KEY

3.PROJECT MANAGEMENT TABLE:-

Stores project or portfolio information shown on the website.

Field Name	Data Type	Constraints
project_id	INT	PRIMARY KEY, AUTO_INCREMENT
project_name	VARCHAR(150)	NOT NULL
description	TEXT	NOT NULL
technology	VARCHAR(200)	NULL
image_url	VARCHAR(255)	NULL
project_url	VARCHAR(255)	NULL
status	VARCHAR(20)	DEFAULT Active
created_at	DATETIME	DEFAULT CURRENT_TIMESTAMP
admin_id	INT	FOREIGN KEY

4.ENQUIRY MANAGEMENT TABLE:-

Stores enquiries submitted by students or customers through the website form.

Field Name	Data Type	Constraints
enquiry_id	INT	PRIMARY KEY, AUTO_INCREMENT
student_name	VARCHAR(100)	NOT NULL
email	VARCHAR(100)	NOT NULL
contact	VARCHAR(15)	NOT NULL
subject	VARCHAR(200)	NULL
message	TEXT	NOT NULL
status	VARCHAR(30)	DEFAULT Pending

Field Name	Data Type	Constraints
admin_remarks	TEXT	NULL
created_at	DATETIME	DEFAULT CURRENT_TIMESTAMP
updated_at	DATETIME	NULL

5.CONTACT MESSAGE MANAGEMENT TABLE:-

Stores messages submitted through a separate Contact Us form, if the website uses one.

Field Name	Data Type	Constraints
message_id	INT	PRIMARY KEY, AUTO_INCREMENT
name	VARCHAR(100)	NOT NULL
email	VARCHAR(100)	NOT NULL
subject	VARCHAR(200)	NULL
message	TEXT	NOT NULL
status	VARCHAR(30)	DEFAULT Unread
created_at	DATETIME	DEFAULT CURRENT_TIMESTAMP
admin_remarks	TEXT	NULL

6.CATEGORY MANAGEMENT TABLE:-

Optional table for grouping services, courses or projects by category, if category management is included.

Field Name	Data Type	Constraints
category_id	INT	PRIMARY KEY, AUTO_INCREMENT
category_name	VARCHAR(100)	NOT NULL, UNIQUE
description	TEXT	NULL
status	VARCHAR(20)	DEFAULT Active
created_at	DATETIME	DEFAULT CURRENT_TIMESTAMP
admin_id	INT	FOREIGN KEY

7.ADMIN ACTIVITY LOG TABLE:-

Optional audit table that records important actions performed by administrators.

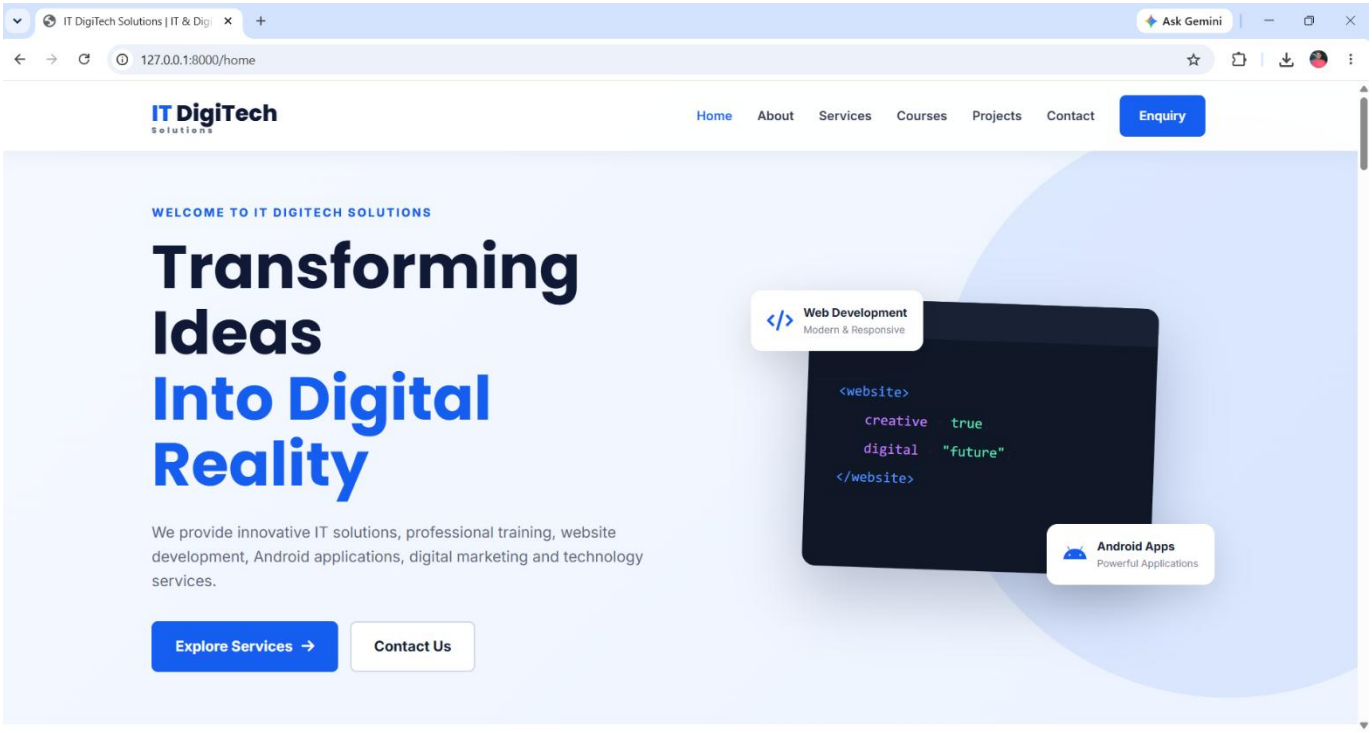

Field Name	Data Type	Constraints
log_id	INT	PRIMARY KEY, AUTO_INCREMENT
admin_id	INT	FOREIGN KEY, NOT NULL
action	VARCHAR(100)	NOT NULL

Field Name	Data Type	Constraints
module	VARCHAR(50)	NOT NULL
details	TEXT	NULL
created_at	DATETIME	DEFAULT CURRENT_TIMESTAMP

FUTURE SCOPE

FUTURE SCOPE OF THE COMPANY

IT DigiTech Solutions has many opportunities to grow in the IT industry. In the future, the company can focus on the following areas:

1. **Website Development:** The company can develop websites for shops, schools, colleges, small businesses and other organizations.
2. **Mobile App Development:** It can start developing Android and iOS applications according to customer needs.
3. **Digital Marketing:** The company can help businesses promote their products and services through social media and online advertising.
4. **E-Commerce Development:** It can create online shopping websites for businesses that want to sell their products online.
5. **Software Development:** The company can develop custom software to solve different business problems and make daily work easier.
6. **AI-Based Services:** It can use new AI technologies to develop chatbots, automation tools and smart applications.
7. **IT Training and Courses:** The company can introduce more programming and technology courses to help students learn new skills.
8. **Business Expansion:** In the future, the company can work with more clients from different cities and expand its services to a larger market.
9. **Cloud Services:** It can provide cloud-based solutions to help businesses store and manage their data online.
10. **Customer Support:** The company can improve its support services to provide better assistance and build long-term relationships with clients.
11. **Website Maintenance:** It can provide regular website updates, bug fixing, backup and maintenance services to existing clients.
12. **UI/UX Design:** The company can offer attractive and user-friendly designs for websites and mobile applications.
13. **Domain and Hosting Services:** It can help clients purchase domain names, host their websites and manage website-related services.
14. **Cybersecurity Services:** The company can provide basic security solutions to protect websites and applications from common online threats.
15. **Business Management Systems:** It can develop billing, inventory, customer management and other software for small and medium businesses.
16. **Internship Programs:** The company can provide internship opportunities to students who want practical experience in the IT field.
17. **Online Learning Platform:** It can create an online platform where students can access course materials, recorded lectures and practice assignments.
18. **Government and Educational Projects:** The company can work on website and software projects for educational institutions and other organizations.
19. **Long-Term Client Relationships:** It can provide regular technical support and updates to maintain good relationships with customers.
20. **New Technology Adoption:** The company can keep learning and adopting new technologies to improve the quality of its services.

Field	Core Technologies / Methodologies
Web & App Development	React, Next.js, Flutter, Node.js, Microservices, Progressive Web Apps (PWAs)
Cloud & DevOps	AWS, Azure, Docker, Kubernetes, CI/CD Pipelines
Data & AI	Python, Machine Learning APIs, Generative AI models, Business Intelligence tools
Digital Performance	AI SEO, Programmatic Advertising, Multi-channel Funnel Tracking

CONCLUSION

The IT DigiTech Solutions Website project was developed with the aim of creating a professional online platform for the company. The main purpose of this website is to provide complete information about the company, its services, courses, projects and other important activities in one place. It helps students, customers and visitors understand what the company offers and how they can connect with it.

The website makes it easier for visitors to explore different services and courses without needing to visit the company's office personally. The enquiry form also provides a simple way for students and customers to share their questions, contact details and requirements. This helps improve communication between the company and its visitors.

During the development of this project, we worked with different web technologies such as HTML, CSS and JavaScript for the frontend and Python Django for the backend. We also gained knowledge about database design, system analysis, DFD, ERD, Use Case diagrams, website testing and deployment. Working on this project helped us understand how the frontend, backend and database work together in a website.

One of the important outcomes of this project is that it provides IT DigiTech Solutions with a platform to present its work and services to a wider audience. It can also help the company build trust among potential customers by sharing useful information about its services, courses and projects.

This project was not only about developing a website but also about understanding the actual requirements of a business and finding a suitable technical solution. It improved our problem-solving ability, technical knowledge and practical understanding of website development.

Overall, IT DigiTech Solutions Website project was a valuable learning experience. It helped us connect our classroom knowledge with practical development work and gavebetter understanding of how technology can support the growth and daily activities of a business.

KEY ACHIEVEMENTS

1. **Online Presence:** Created an online platform for IT DigiTech Solutions.
2. **Easy Information:** Provided company details, services, courses and projects in one place.
3. **Attractive Design:** Developed a simple and user-friendly website.
4. **Enquiry Form:** Made it easier for visitors to contact the company.
5. **Frontend Development:** Used HTML, CSS and JavaScript.
6. **Backend Development:** Used Python Django for backend functionality.
7. **Database Design:** Planned database structures for website information.
8. **System Design:** Prepared DFD, ERD and Use Case diagrams.
9. **Website Deployment:** Published the frontend using Netlify.
10. **Practical Experience:** Gained experience in website development and testing.
11. **Client Requirements:** Understood the needs of a business website.
12. **Future Improvements:** Created a base for adding new features.
